

You fire it up!  
You want to fire it up?  
So I guess you know...  
I guess you feel it...

I can't stand your chat  
yes I had a bit of food caught in my teeth  
(you're getting better)  
Change the subject before I take back what I think  
(you're getting better)  
I'm checking left, I'm checking right  
attempt to try to catch an eye  
try to kill some time until I think your getting better

Got say it when you're steaming you light up my night  
Get turning up the heater now  
Fixing something in your mix it really perks you right up  
turning up the heater now  
What's funny is I guess that you know...

You fire it up,  
walked right up and you talked non-stop  
I guess you feel it fighting its way out  
just a little bit of personality  
(you're getting better)  
Joking your way back into my good books,  
stumbling and smiling  
(you're getting better, I think you might be getting better)  
My turn to pay, your turn to pay  
No need to try to catch an eye  
nor try to kill some time cos  
you're getting better, I think you might be getting better

Got say it when you're steaming you light up my night  
Get turning up the heater now  
Fixing something in your mix it really perks you right up  
turning up the heater now  
Can't only be pure chemistry that keeps us tight  
turning up the heater now

What's funny is I guess that you know  
Avoiding me until you're bubbling, you know  
Used up all of your lines  
already nothing to talk about no  
I define the bind that's cut or holds

What's funny is I guess you always really knew  
What's funny is I reckon it don't bother you  
Not funny that by day we wont see it improve

Got say it when you're steaming you light up my night  
Get turning up the heater now  
Fixing something in your mix it really perks you right up  
turning up the heater now  
Can't only be pure chemistry that keeps us tight  
turning up the heater you know
