

Take You There

Dondria

Can't trust these black mirrors
Perception is deception
That Miss in your direction's misdirection
I'm tryna give you realer
I'm tryna give you feeling
I know you miss that feeling like

Ooh nah nah nah
I can hear your body calling out for my
Skin, soul, and mind
I got something special for a whole life time

This is not the wave, you can have the ocean
This ain't man-made, Baby let me take you there
Baby focus, give me your devotion
Let me elevate ya, I know I can take you there
Take you there, Baby let me take you there
Take you there, Baby let me take you

Now I can work them angles
Do it for the 'Gram, have you sayin Damn, Baby where you been
Don't get it twisted, Boy I got whatcha missing
They got that drive-thru, this nutritious, come get this
Have you coming back, it's finger-lickin
It's more than just physical, this one in a million
We can make this spiritual, me and you get lifted
You don't have to say it cause I know you miss that feeling like

Ooh nah nah nah
I can hear your body calling out for my
Skin, soul, and mind
I got somethin special for a whole life time

This is not the wave, you can have the ocean
This ain't man-made, Baby let me take you there
Baby focus, give me your devotion
Let me elevate ya, I know I can take you there
Take you there, Baby let me take you there
Take you there, Baby let me take you

I fantasize of you and I
Mesmerized, the vibe is high
Let me take you on a ride, take you on a ride
I got whatchu need, I know whatchu like
The grass is greener on this side with me
Whatchu need yeah it's inside of me
Let me take you there, take you there, take you there, take you there

This is not the wave, you can have the ocean
This ain't man-made, Baby let me take you there
Baby focus, give me your devotion
Let me elevate ya, I know I can take you there
Take you there, Baby let me take you there
Take you there, Baby let me take you
