Hush

Hush, can't you see what is there Don't wake the lost It's all just around you and Hush, can't you see what is there Calling the coast Oh its all just around you (yeah)

Waking up for moment Finding you're not there Is all that's left I promised us forever Hiding out the feelings All that can rest

So oh wont you sing a song, Oh wont you sing a song for me And I will sing along I will sing along you'll see

Hush, can't you see what is there Shadow and soaps It's all just around you And hush, can't you see what is left Of these hollow bones It's all just around you (yeah)

Waking up for moment Finding you're not there is all that's left I promised us forever Hiding out the feelings All that can rest

So oh wont you sing a song Wont you sing a song for me And I will sing along I will sing along you'll see

And oh wont you sing a song Oh wont you sing a song for me And I will sing along I will sing along you'll see-eee...

Hush, can't you see what is there Don't wake the lost Oh it's all just about you Dotan
