

No Words

Dotan

Sunlight creeps in
Cracks in the door
I'll step outside
When the world's sleeping

My head held low
Out of control
Words hurt the most
When there's no meaning

And the wolves outside
They come at my door
Cold like the snow
As they breathe on me
And the lies they write
Made me start the fall
I'm holding so tight
But my hands let go

No words, silence
I just let the music speak
Frozen, quiet
Broken by the big machine

It's like you've lost your faith in me
When all your bullets start to bleed
No words, silence
I just let the music speak

Sand on my feet
Far as I can be
It all feels so bleak
'Cause the winds still whisper

But why can't you see?
Lines run so deep
Gave me the key
To the dark underneath

And the wolves outside
They come at my door
Cold like the snow
As they breathe on me
And the lies they write
Made me start the fall
I'm holding so tight
But my hands let go

No words, silence
I just let the music speak
Frozen, quiet
Broken by the big machine

It's like you've lost your faith in me
When all your bullets start to bleed
No words, silence
I just let the music speak

I just let the music speak

And the wolves outside
They come at my door
Cold like the snow
As they breathe on me

No words, silence
I just let the music speak
Frozen, quiet
Broken by the big machine

It's like you've lost your faith in me
When all your bullets start to bleed
No words, silence
I just let the music speak
