

# Satellites

Dotan

Wait  
Till it all breaks down  
To the river  
Where we're hiding out  
Talk  
Till you've said it all  
Will you hold me?  
So the walls don't fall

Holding out my lungs  
I'm all out of love  
Where did it go wrong?  
Body black and blue  
Wearing of my shoes  
Why's that not enough?

All we are is satellites  
We're passing through the dead of night  
We run closer to the darkness  
Try to find the heart and  
Watching how it all collides  
All we are is satellites

Take  
Till I'm all used up  
And I let you  
'Cause it's in my blood  
Your hands  
Make me feel like home  
But I'm shaking  
'Cause it heals what I've broke

Holding out my lungs  
I'm all out of love  
Where did it go wrong?  
Body black and blue  
Wearing of my shoes  
Why's that not enough?

All we are is satellites  
We're passing through the dead of night  
We run closer to the darkness  
Try to find the heart and  
Watching how it all collides  
All we are is satellites

Falling lies  
We still have so much to say  
You and I  
Are we wasted?

All we are is satellites  
We're passing through the dead of night  
We run closer to the darkness  
Try to find the heart and  
Watching how it all collides  
All we are is satellites
