

Used to Know

Dotan

My soul, My heart
Oh I left it there
Dark clouds, Dark thoughts
But I'm in repair

Oh I wonder
Is it over
Can I reach out once again

My soul, My heart
Oh I left it there

Gone with the dead of night
Can anybody tell me how to make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know

Memories out of sight
I wish that all the fighting could make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know

Your skin, Your coat
Oh you left it there
Locked in, Lights out
When you disappeared
Can you fake it
Or just make it
Into something like you cared
Your skin, Your coat
Yeah you left it there

Gone with the dead of night
Can anybody tell me how to make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know

Memories out of sight
I wish that all the fighting could make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know

Left cold beneath
The scars and the sheets
There's nothing that we used to hold

But you left all of me
So lost in the deep
From something that we used to know

Left cold beneath
The scars and the sheets
There's nothing that we used to hold

But you left all of me
So lost in the deep
From something that we used to know

Gone with the dead of night
Can anybody tell me how to make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know

Memories out of sight
I wish that all the fighting could make it right
We're drowning in the shadows where we lost the light
That we used to know
We used to know
