

Where We Belong

Dotan

Listen to what I gotta tell you
Are you ready for what's coming now
I've been hanging on to the secret
Where do we go for here
Is this road unclear
All this time, you were next to me
This perfect lie, which only you can't see
Open my eyes to where we belong
We can justify now, where we standing
Bigger crime, to pretend
There's only one way to where we belong
It's time to become a addiction
But how are you supposed to know
Your image is right there before me
Even tough I'm all alone up here
Is this road unclear
All this time, you were next to me
This perfect lie, which only you can't see
Open my eyes to where we belong
We can justify now, where we standing
Bigger crime, to pretend
There's only one way to where we belong
This is where we are
We just can't hide
Nothing but the truth
Are you ready for the right
Are you ready for the right
All this time, you were next to me
This perfect lie, which only you can't see
Open my eyes to where we belong
We can justify now, where we standing
Bigger crime, to pretend
There's only one way to where we belong
All this time, you were next to me
This perfect lie, which only you can't see
Open my eyes to where we belong
We can justify now, where we standing
Bigger crime, to pretend
There's only one way to where we belong
Where we belong
Where we belong
Where we belong
