

Somebody

Double You

And if you love somebody
And if you want somebody

You've got to tell the people of the world
Let's get on up we're ready to go

You've got to make the people understand
That love is not a one night stand

We've got to show the children of the world
They gotta hold on tight and not let go

You've got to tell the people of the world
To open up and show their love

And if you love somebody
You need somebody to love
And if you want somebody
Then find somebody to love

Somebody somebody
Somebody somebody...

You've got to tell the people of the world
Let's get on up we're ready to go

You've got to make the people understand
That love is not a one night stand

You've got to tell the people of the world
Let's get on up we're ready to go

We've got to make the people understand
That love must be in every land
