How Do I Get Off The Moon

Doug Stone

We took off like a rocket ship to a place that we'd never been You took me higher and higher and higher I never thought it would end Then I woke up to find you'd left me behind Now what am I supposed to do Tell me how do I get off the moon

Tell me how do I get these stars from my eyes And how do I get on with my life How do I hold someone new when I can't let go of you Tell me how do I get off the moon

I never planned on leaving Guess you never planned to stay And after we'd come so far together How you'd just walk away and leave me up here In this cold atmosphere lost without a clue Tell me how do I get off the moon

You made it look so easy girl Now the least that you can do Is to tell me how do I get off the moon Tell me how do I get off the moon
