

Another World

Down with Webster

I think about you in the nighttime
Saving me loving, but it ain't mine
I need a minute, we could take five
Because we had it all before

But now I'm never in my right mind
Wrong places at the right time
Looking for something that I can't find
Because we had it all before (come on)

I met you in the club
Maybe it's something in your tone
You say you're better off alone
But now you're never on your own, no
I find you in another, in another, in another world
Find you in another, in another, in another world
I know that you don't get it, so
I'm never critical
Hit that pinnacle
I find you in another, in another, in another world (going, going down)

Never wanna waste time
You been taking, playing tricks just to get by
If you ever land, I could make time
Because we had it all before

But now I'm always with a brand new
Girl, but they ain't you
Would you answer if I came to?
Because we had it all before (come on)

I met you in the club
Maybe it's something in your tone
You say you're better off alone
But now you're never on your own, no
I find you in another, in another, in another world
Find you in another, in another, in another world
I know that you don't get it, so
I'm never critical
Hit that pinnacle
I find you in another, in another, in another world (going, going down)

We could try to pretend but it's all the same old story
And I ran to the end so I know that it's not for me
Time's on our side but I know it won't be always
'Cause the heart only wants what it wants so I've been sorry

I find you in another, in another, in another world
Find you in another, in another, in another world
I know that you don't get it, so
I'm never critical
Hit that pinnacle
I find you in another, in another, in another world (going, going down)
