

Sleep In The Dark

Downstait

Talking to the wind, I almost believed myself
Every single day, I run into the truth
Fire in the sky, I manage not to notice
If only you and I, had never lost our focus

Sleep in the dark and you will find your light
I never saw that you were miserable inside

Fearing your light, keeping you away
Doesn't that tell you what prices must be paid
In a little bit, the time that you have left
You can try to realize the pain inside your chest

Over and over and over and over
The world told the puppet to act like a soldier
It won't stop, it won't stop, there's no way to end this
The cost of the world, it can not even end it

[Yells]

Sleep in the dark and you will find your light
I never saw that you were miserable inside
