Afraid to see your eyes
Although I feel my tears have dried
The stars are on my side
And I know the reasons why

So you'll leave me now But before you say goodbye

Although you're far away I know that you will stay With me forever.

No matter that you'll go I will always miss you so, Miss you so
Oh, the last word.

Say you won't forget How destiny brought us together And I hope that you will find All your dreams realized

So you'll leave me now
But before you say goodbye

Although you're far away I know that you will stay With me forever.

No matter that you'll go I will always miss you so Miss you so, whoa.

Although you're far away
I know that you will stay
with me forever
No matter that you'll go
I will always miss you so
Miss you so
Whoa

Although you're far away, I know that you will stay with me forever
No matter that you'll go I will always miss you so Miss you so, whoa.

Ohh.
