

We are the ones who have been true
We are the fire that burns in you
Around the corners to the light of day
And then come what may

In the streets of cobblestone
When you're tired and alone
We will guide you on your way back home
Wherever you may roam

Rising Forces
In the cold remorseless
And in the darkness
Will we ever be free?

Glorious! Victorious!
And the sun is shining on for us
In our darkest hour
We will reach for the stars!

Glorious! Victorious!
And the gods are watching over us!
With our mighty power
The Unicorn Union unites!

Through a night of shooting stars
Beyond Jupiter and Mars
To the edges of the universe
We break every curse

Far beyond the end of time
When the stars will all align
And the burning gates of Babylon
Are now far gone

Rising Forces
Guide our courses
Out of the darkness
When we will be free!

Glorious! Victorious!
And the sun is shining on for us
In our darkest hour
We will reach for the stars!

Glorious! Victorious!
And the gods are watching over us!
With our mighty power
The Unicorn Union unites - tonight!
