

My baby astrolab  
Let's go and take a walk outside  
Before it gets too cold  
I want you to hold me  
And pretend you know  
Every single secret this universe holds  
Now and forever

My baby astrolab  
My baby astrolab  
Take my hand, take my heart

I hope you understand  
That every single thing up there  
Falls into nothingness

So come on baby astrolab  
Let's get away before it's over  
Now and forever

My baby astrolab  
My baby astrolab  
Take my hand, take my heart
