

Take your shot, take the fight
My fists are up my hands are tight
Steady flame, burn the arch
I take the blame, can't take enough
You know I can't take it, no no no
Can't feel my soul, soul soul

I'm breaking over
I'm falling under under under still
Under covers you, you find another
You know you wanna kill kill kill
You know wanna you know you know you wanna kill kill kill

Turn around, I'll sit back
It's too late now, I'll fade to black
I might be wrong but you'll still stay stay stay
Cause I...
Don't matter where we go
Don't matter any more
I know you know we're going
I might be wrong but you'll still stay stay stay

We're going down when I say
Hit the ground running and fade away
I might be wrong but you'll still stay stay stay
Cause I..
Don't matter where we go
Don't matter any more
I know you know we're going
I might be wrong but you'll still stay stay stay
