

Out of the Cages

Earth Crisis

Never turn my back on them
I could never live as I once did
I have to obey my conscience and answer to all
That it bids
Why would the hand of fate place me here
If it wasn't to heed the call?
Destined to be the one who steps up
Out of line to save them
All the files dissolve
Awash in smoking acid
Ill gotten gains their total destruction
Rushed through the lab to set the prisoners free
From the horror that they were locked into
If what went on behind these walls

Happened in the public's view
These tests would end from the disgust
This would never continue
Ticks of the clock rushing forward
There's only moments of time to rescue them
Then to escape follow the plan
Line by line
The files dissolve awash smoking acid
Ill gotten gains their total destruction
Rushed through the lab to set the prisoners free
From the horror that they were locked into
Out of the cages
Out of the cages
Out of the cages
Out of the cages
