

# Be Right Now

Ed Sheeran

A lifetime is starting to feel like  
It's falling short of the mark  
But it's all that we got  
Every teardrop, every wrong turn  
Made the moment we found  
And it's coming around, around, around, around, around

I don't wanna miss one thing  
We can turn the whole world down  
And listen to the in-between  
We are, we are the sound  
There's nothing but the space we're in  
The hurry and the noise shut out  
Just stay here and be right now

The shadows cling to the ceiling  
And fracture the light that lands in our eyes  
Every moment changes the whole view  
And just when it ends  
I feel it again, again, again, again, again

I don't wanna miss one thing  
We can turn the whole world down  
And listen to the in-between  
We are, we are the sound  
There's nothing but the space we're in  
The hurry and the noise shut out  
Just stay here and be right now

Nothing else matters  
Nothing else matters  
Nothing else matters  
Stay here and be right now

Nothing else matters  
Nothing else matters  
Nothing else matters  
Stay here and be right now

I don't wanna miss one thing  
We can turn the whole world down  
And listen to the in-between  
We are, we are the sound  
There's nothing but the space we're in  
The hurry and the noise shut out  
Just stay here and be right now
