

# Love In Slow Motion

Ed Sheeran

It's been a while since we've been alone  
So turn off the world and the telephone  
I need to tell you you're beautiful  
'Cause it's been a while  
And I apologise

I just get caught up in the rat race I'm running  
Chasing a moment I'm hoping is coming  
If I stopped and took a look around  
It's in front of my eyes, eyes

Baby, let's slow down time  
Maybe just press rewind  
Darling, that dress reminds  
Me of the first time

And I wanna love tonight  
One on one by the candlelight  
Over and over we spend our lives  
Living fast forward  
But not tonight  
Love in slow motion

It's been a while since it was you and me  
Too many friends, too many evening drinks  
Yeah, we commit to so many things  
But not to ourselves  
And I apologise

Sometimes you're sad and you tell me it's nothing  
And I brush it off because there's always something  
But I need to change my perspective  
And prioritise, -ise

There's one thing I know, it's this  
Every moment missed  
Can be restored with your lips  
It only takes one kiss

And I wanna love tonight  
One on one by the candlelight  
Over and over we spend our lives  
Living fast forward  
But not tonight  
Love in slow motion

Ooh ooh  
Ooh ooh

Love tonight  
One on one by the candlelight  
Over and over we spend our lives  
Living fast forward  
But not tonight  
Love in slow motion

Wanna love tonight

One on one by the candlelight  
Over and over we spend our lives  
Living fast forward but not tonight  
Love in slow motion  
In slow motion  
In slow motion
