

# Every Night I Fall In Love With You

Eddie Rabbitt

I've held you and I've kissed you at least a million times  
But never, no, never, have you felt so fine  
You just get better, we fit together  
Always

And every night I fall in love with you  
You always make love new  
It's always like the first time  
And every night I want you even more  
Than I did the night before  
So come into these lovin' arms of mine  
Let's fall in love again  
Let's fall in love again  
Tonight

I love you and I'm into every move you make  
I want you and I need you so much, sometimes I ache  
You still excite me, still mystify me  
Always

And every night I fall in love with you  
You always make love new

It's always like the first time  
And every night I want you even more  
Than I did the night before  
So come into these lovin' arms of mine  
Let's fall in love again  
Let's fall in love again  
Tonight

You still excite me, still mystify me  
Always

And every night I fall in love with you  
You always make love new  
It's always like the first time  
And every night I want you even more  
Than I did the night before  
Now come into these lovin' arms of mine  
Let's fall in love again  
Let's fall in love again  
Tonight  
Let's fall in love again  
Let's fall in love again  
Tonight
