

I Don't Worry 'bout You

Eddie Rabbitt

I used to get around, man about town
Thought I was cool, right
What was I thinking of falling in and out of love
Night after night?

Woah, this world is a dangerous place
You never know what's behind the strangers face
I'd rather just be one on one, love on love
Like it is with you and me

And I don't worry 'bout you
And you don't worry 'bout me
We don't have to be afraid
The love that we made, it comes naturally

So come on baby make me smile
And let me hold you for a while
We trust each other
There's no other, that's the way it should be
I don't worry 'bout you
You don't worry 'bout me

And if I had a chance for a quick romance
With somebody new
Why would I jeopardize the love that's in your eyes
It's honest and true

And I'd rather give it all to one girl
And know that I'm the only man in her world
I'd rather it be one on one, love on love
Like it is with you and me

And I don't worry 'bout you
And you don't worry 'bout me
We don't have to be afraid
The love that we made, it comes naturally

So come on baby make me smile
And let me hold you for a while
We trust each other
There's no other, that's the way it should be
I don't worry 'bout you
You don't worry 'bout me

Once in a life you find someone
Someone who loves you right
From the start you put your heart in their hands

And I don't worry 'bout
I don't worry 'bout you
And you don't worry 'bout me
We don't have to be afraid
The love that we made, it comes naturally

So come on baby make me smile
And let me hold you for a while
We trust each other

There's no other, that's the way it should be
I don't worry 'bout you
You don't worry 'bout me

I don't worry 'bout you (I don't worry 'bout you)
And you don't worry 'bout me (You don't worry 'bout me)
We don't have to be afraid
The love that we made, it comes naturally

So come on baby make me smile...
