

You Can Do Anything

Eddie Rabbitt

You put the key in the lock and you turn it
You put the key in the lock and you turn it
You put the key in the lock and you turn it
And open up the door

You put your foot in your shoe and you lace it
You put your foot in your shoe and you lace it
You put your foot in your shoe and you lace it
And then you walk around

And you can do anything you wanna do
All you gotta do is do it
Put your mind to it and you can be the best there is
All you gotta do is practice

You put a dream in your heart and you dream it
You put a dream in your heart and you dream it
You put a dream in your heart and you dream it
That's how dreams come true

You put the pencil on the paper and you write it
You put the pencil on the paper and you write it
You put the pencil on the paper and you write it
And then you read it back

You put your fingers on the keys and you play it
You put your fingers on the keys and you play it
You put your fingers on the keys and you play it
And then you play it again

And you can do anything you wanna do
All you gotta do is do it
Put your mind to it and you can be the best there is
All you gotta do is practice

Put a dream in your heart and you dream it
You put a dream in your heart and you dream it
You put a dream in your heart and you dream it
That's how dreams come true
That's how dreams come true
That's how dreams come true
