

S.O.S.

Edgewater

Your signals have faded out
You're such a hit and miss
And I can't even get a sound
So face me
And hear me out

Lie together, wide awake
What's the matter now?
You're so un-phased
Locked in your safe place
Let me in
Just let me in

You are not alone
I just have to say

Help me
Cut away
The space between
That we have made
Help me
Find a way
To let me in
And make a place for me

As you fall asleep
I'm taken back to memories
We've had our times
Ups and downs
But we seemed fine

As we lie awake
Laughter and tears we hate
Travel through my mind
And leave me south of sideways
I said we'd be okay
But you hesitate
Is there something you're not telling me?

You're so un-phased
Locked in your safe place
Let me in
Just let me in

You are not alone
I just have to say

Help me
Cut away
The space between
That we have made
Help me
Find a way
To let me in
And make a place for me

You are not alone

I just have to say

Help me

Cut away

The space between

That we have made

Help me

Find a way

To let me in

And make a place for me
