

Du Trefonds Des Tenebres

Elend

[Premier Nocturne]

Horror, Lucifer solutus,
Anguis a catenis suis liberatus.
A sparkling shade of hate embraced the whole horizon.
A shadow of horror is risen
The Sun is bent,
Consumed with deepest sins.
Terror rains from the skies.
De caelo pluit terrore,
Igne et aestu, igne ardenti,
In fornacem ignis aeterni.
Abyssus umbras suas ingentes
Iacet in latera adamanteia.
Nos devorat lux reperiussa.
Above your visions, a circumradiant Sun,
And in your Eyes, vibrant with echoes,
A deafening and neverending commotion.
The path of the Angel is a firmament of tears.
Fawn blazes of fury from the First Eye of God.
Mikhael. Raphael. Gabriel. Uriel. Raguel. Sarakiel.
Moloch. Chamos. Baalim. Ashtaroth. Astarte.
Belial. Beelzebub. Apollyon.
In Inferno reigned the enchanterers of pain.
We write the scriptures of moans.
We spread the spawn of Despair.

Shaitan Lucifer
Lucifer, qui mane oriebaris.
Kill me for Thy Name's Sake.

Omega and alpha, the last and the first,
He that liveth through death and life inverted.
Hell was not so dark a labyrinth to hide this face,
Admire it scarred by lightnings.
For Thee I beheld no Mercy Seat of gold...
But the screams of Heaven crucified.
In profundis tenebrarum
Aurei cruentique solis occasus.
Dominus fletum e Styge hausit,
Solus beryllus continet lucentes illas lacrimas.
Dominus fletum e Styge hausit,
Tamen in eius profundis abyssus abyssum invocat.
The Light echoes the Light.
The dead envy the dead.
Our burned feathers cloud
The infinite reflexion of the decentred moons.
In the dead of night,
The heart of the night
Knows a more shining star.

Sub atro sole
Tenebris lucet abyssus temporis.
Domini nomen foedatum,
Peritum regnum caelorum.

I unname Thee, Ialdabaoth.

Under a black sunset
Every creature foundered
In the petrifying abyss of Time.
Paradise regained!
Paradise regained!
Paradise regained!
We'll reap the fruits of glory...
