

Something To Think About

Eleni Mandell

We pray for name
As a water's rights
And my... said he told the truth, but he lied
The president said he'd close the jail
Cause it's the right thing to do
But the president closed the jail
Like he promised to
It's something to think about
But I don't want to think about anything
Except me and you

There's raging far and gold and state
We're sinking the ocean while we lit up light on a birthday cake
The snow falls down harder and faster
The wind blows round living nothing but disaster
A man with a gun, a man with a gun
Says he needs one to be free
It's something to think about
But I don't want to think about anything
Except you and me, you and me

And all the news is bad news
But I would walk in the sun
I will go so long with indigo blue
I just want to have fun
We're bailing... and turn it down
Where is sand on the things that we want
And we want the things to flow in the...

The president said he'll end the war
Cause it's the right thing to do
But the president ended the war like he promised to
It's something to think about
But I don't want to think about anything
Except me and you
On our way to the protest march on the mall
We're waving our signs and
We're singing our songs
And we're limping our arms
Save the world, save the world
Save the world, save the world
