

We could take this road to nowhere in my `89 and floor it through
state lines and we'll reach our
destination whatever it might be as long as you don't leave

Cause I don't ever want to slow this down everything I've ever
wanted has been found we could drive into
the future with our memories holding on to all we believe

We could throw away our cell phones and only answer calls coming
from the stars we could catch a
drive-in movies and let the hours pass cause nothing perfect can
last can last

[chorus]

Cause I don't ever want to slow this down everything I've ever
wanted has been found we could drive into
the future with our memories holding on to how things used to be
