

Drive

Eli Young Band

We're all just kids cutting grass in the USA
Trying to save up for a tank of someday
Sweating underneath the July sun
Working all day til we got something to

Drive through the midnight air
if we need four wheels to get us way up where
Girls like to see those city lights
Just waiting on the day when we can say, yeah

I got the keys, I got the car
I got the dreams, I got the heart
Baby I don't know where we're going
Girl let's go too far
Close your eyes and I'll drive

Red lights waiting on a touch of green
Back roads, two lanes blowing off steam
Mustang Sally on the road again
"Me and Bobby McGee" singing wish it was [friends]

I got the keys, I got the car
I got the dreams, I got the heart
Baby I don't know where we're going
Girl let's go too far
Close your eyes and I'll drive

Loving makes us feel like sweet sixteen
Like hands on the wheel of that time machine
We got two white lines not as blue and black
We may never grow up we may never come back

I got the keys, I got the car
I got the dreams, I got the heart
Baby I don't know where we're going
Girl let's go too far
Close your eyes

I got the keys, I got the car
I got the dreams, I got your heart
Baby I don't know where we're going
Girl let's go too far
Close your eyes and I'll drive
