

Fingerprints

Eli Young Band

One more drink and you'll go
But that's a lie 'cause we both know
How this starts, and how it ends
We go down this road again
You take my hand, pull me tight
Turn up the heat, turn down the lights
You won't stop until my skin
Is covered in your fingerprints

You show back up, I let you in every time
You end up runnin'
Like you're runnin' from the scene of a crime
You know how to make your, make your mark
You know how to take a, take a heart
Break it all to pieces, burn it with a touch
You're gonna leave me with nothing but
Fingerprints

Sun beats through, the morning blinds
Not a trace of you in sight
I tell myself "Never again"
As I wash away you fingerprints

You show back up, I let you in every time
You end up runnin'
Like you're runnin' from the scene of a crime
You know how to make your, make your mark
You know how to take a, take a heart
Break it all to pieces, burn it with a touch
You're gonna leave me with nothing but
Fingerprints
Oh yeah, fingerprints

There's just somethings you just can't change
Fingerprints
No matter what they stay the same
Fingerprints

You show back up, I let you in every time
You end up runnin'
Like you're runnin' from the scene of a crime
You know how to make your, make your mark
You know how to take a, take a heart
Break it all to pieces, burn it with a touch
You're gonna leave me with nothing but
Fingerprints
Your fingerprints
