

After Dark

Eliot Sumner

After dark there's after light, there's appetite for love
Laughter swells, and after spells, it's hard to get enough
So after dark we sail away, we sail away tonight
The after hour, the after hour, the opportunity awaits

So stay now, what if I stay now?
If i stay here I might loose again
So stay now, what if I stay now?
If I stay here I might loose a friend

After life the after life I ease the mind with you
I need the light the after light to see
If you can bear another hour, the after hour awaits
To sail away we sail away take an opportunity with me

So stay now, what if I stay now?
If i stay here I might loose again
So stay now, what if I stay now?
If I stay here I might loose a friend

But I don't really care after dark
No I don't really care after dark

So stay now, what if I stay now?
If i stay here I might loose again
So stay now, what if I stay now?
If I stay here I might loose a friend

But I don't really care after dark
No I don't really care after dark
No I don't really care after dark
No I don't really care after dark
