

# Brightest Blue

Ellie Goulding

Everything is heightened now  
It's looking so much brighter now  
I was lost and now I'm found  
Fell off the merry-go-round  
I was in the politics  
Obsessed with things I couldn't fix  
Kissing bigger with a fist  
Addicted to the thrill of it

And with these colors fading  
People changing feelings  
Faking some kind of love  
A different flavor, seek the danger  
Feel new life rush into my blood  
Illuminated never shaded  
See the future when I look in the sky  
When I look in the sky, you give me  
You give me

The brightest blue, the brightest blue  
Tonight give me the brightest blue  
The brightest blue, so bright

There's no blue in the odyssey  
Even in the calmest seas  
Now it's all I wanna be  
A semi-precious mystery  
Yeah I love me more than you  
Doesn't mean I can't be true  
Slip into the blue lagoons  
I could be your muse

Times are hard, people scarred  
We don't know if we're gonna fight  
Break a heart, play the card  
We just came along for the ride  
But in the dark, you're the spark  
See the future when I look in your eyes  
Cause you've given me, you give me  
You give me

The brightest blue, the brightest blue  
Tonight give me the brightest blue  
The brightest blue, so bright

Don't you worry about the future  
Cause this is the blue evolution  
I don't think this love's an illusion  
So let's wake up  
Don't you worry about the future  
Cause this is the blue evolution  
I finally see you're my greatest  
You're my greatest revelation

The brightest blue, the brightest blue  
Tonight give me the brightest blue  
The brightest blue, so bright
