

New Heights

Ellie Goulding

All this time I felt completed
All this time I felt I needed you by my side
Even if we'd fight and fight again
The nights with you were so disarming
Taking all my weapons from me I found myself
Powerless with you
I tried to be just like those other girls
Accepting situations stop the search
For something brighter, got to stay excited
Your love will always be my validation
Float in permanent vacation
I'd close my eyes, to shut out the sky

Reaching these new heights
Love without someone else feels right
Love for myself in this new light
There's something much deeper inside

Something died the day I fell for you
Pourin' vodka in my apple juice
I smoked the night away
You were my escape
To what I thought was everything
Find someone to lose myself with
But I'm not buying it, and you're not either
Everything is beautiful
Maybe cause we're doomed we're whole
Baby cut me loose, I want to fall, fall

Reaching these new heights
Love without someone else feels right
Love for myself in this new light
There's something much deeper inside

I want to see the world before it disappears
I've got much wiser through the years
I'm searching for, I'm searching for
A higher love
I wanna see the world before it disappears
I've got much wiser through the years
I'm searching for, I'm searching for

Reaching these new heights
Love without someone else feels right
Love for myself in this new light
There's something much deeper inside
