

Drown Those Days

Elysian Fields

Recall the scent How she lay The sediment Drown those days Drown those days Dig your hole Dig it fast To get to China Forget the past Forget the past Secrets bleed on the battlefield Bottom feeding Spit on the sun From her force field You can barely hear her sigh Drown those days Drown those days Choke the night Keep your distance Dim the light Dim the light In the forest of natural law Rustling leaves Hear them fall Hear them fall Mark off the days on your calendar It's almost over Playing for time With no challenger But you still love her Drown those days Drown those days Drown those days
