

Night Melody of the Pull

Elysian Fields

Never gone Can't hide for long Never gone But turning Always changing course Like clouds through the moon Her blinding force Will beckon you soon Silvery Shining and cool It's stretching us still From opposite suns Conquering Stay with me now Beholden to night's memory Whispering you're still everything You're everything still Hear my voice This is the last bell Make this choice Our kiss is still warm Take this chance Ride out this storm Conquering Lay with me now Enfolded in night's melody Whispering you're still everything The silver unwinds Oceans sing Love so divine So divine Love so divine
