

When She Comes

EMA

We can leave it on the nightstand
When she comes, when she comes
She'll be searchin' for her knives back
When she comes, when she comes
She'll be rarin' for a fight
When she comes, when she comes
But we're all alone tonight

She's my favorite animal
But she gets violent what the fuck

They'll be psilocybin nightmares
When they come, when they come
We will terraform the night, yeah
When we come, when we come
They'll be beggin' for their lives
When they come, when they come
But there's nothing more to write back
When they come, when they come

So gaze in dorothy's mirror pond
Til you come and make me fawn

And we'll blame it on the white man
When he comes, when he comes
We will telephone his wife, yeah
When she comes, when she comes
Cuz he does it for the spite
Yeah, when he comes, when he comes
And we wanna do what's right
Yeah, when we come, when we come

Not too long we're in this world
So what'd you even come here for?
