

Epiphany

Emil Bulls

just a little bit closer save us guide us keep us warm
just protect us from our inner self
closer save us guide us keep us warm
just protect us from our inner self

it's feeding time
give us all the things we lust for
still our greed with all you got
and then give us some more
we're at the gates
now open sesame
we can't get enough
oh won't you come

just a little bit closer save us guide us keep us warm
just protect us from our inner self
closer save us guide us keep us warm
just protect us from our inner self
it slips back to bad old ways the plague is coming home
the concubines of debauchery
sing their slinky song
the blood is pumping in our heads
we're foaming at the mouth
like greedy dogs we're waiting for you to set us free
epiphany

devil may care
abstemiousness go fuck you
hedonism is the most faithful friend
on our dissolute crusade
we gang together
like bees round the honeypot
give us your blood
oh won't you come

just a little bit closer save us guide us keep us warm
just protect us from our inner self
closer save us guide us keep us warm
just protect us from our inner self
it slips back to bad old ways the plague is coming home
the concubines of debauchery
sing their slinky song
the blood is pumping in our heads
we're foaming at the mouth
like greedy dogs we're waiting for you to set us free
epiphany

give us booze give us birds give us gold
and ivory gluttony revelry come on open sesame
now open sesame
we need supplies to overindulge

it slips back to bad old ways the plague is coming home
the concubines of debauchery
sing their slinky song
the blood is pumping in our heads
we're foaming at the mouth

like greedy dogs we're waiting for you to set us free
