

Better Like This

Emma Drobná

Heart so big, we can all live in it
Mouth so kind, never telling no lies
Love so pure, I can't deny
Meeting you was best, and I tried, I tried

Trust me, you're the reason I
I have darkness in my mind
But believe me, give me light
We are better like this, ready to fight the crises
Hand in hand, with mine, I'm yours
We are better like this

I need to go out of town, out of town and out of sight
No need to leave you far behind, there's no need to cry and cry
, cry and crying all the time

Pack your bags and just run from me, lie for me, die for me
Don't wanna think about living on the other side
Breathe for me, steal for me, heal with me
For every time you leave me
Every time I see things clearly
You're the right one for me and

We are better like this, ready to fight the crises
Hand in hand, with mine, I'm yours
We are better like this
We are better like this, ready to fight the crises
Hand in hand, with mine, I'm yours
We are better like this
