

## Hold On

Empires

They're going to take your eyes away  
They might try to poison my heart  
We've got to make them find us in the dark

I started to love your way  
In secret while the watchmen play  
You've given me the greatest fate I've known

Hold on  
I won't let them take you

And in the twilight of escape  
Both of my arms gunnin' your waist  
When what assaulted counsel were awake

I started to love your way  
In secret while the watchmen played  
You've given me the greatest fate I've known

Hold on  
I won't let them take you
