

# I Know You Know

Empires

Oh honey, I can feel that we're near it  
Can you feel the world slowly moving?

I know you know that I'll love you all around the room  
And I'll dream all night to touch you the way I do  
I know you know where I am when we lose eyes  
You can feel me more than I can, just leave your mind

Now honey you can trick me to feel right  
I can't believe I know what you taste like

I know you know that I'll love you all around the room  
And I'll dream all night to touch you the way I do  
I know you know where I am when we lose eyes  
You can feel me more than I can, just leave your mind  
(I know you know that I love you  
Just leave your mind)  
I'll dream all night to touch you

We were made up, we were made up right, I don't know.  
We were made up, we were made up right, don't you know?  
We were made up, we were made up right, I don't know.  
We were made up, we were made up right, don't you know?  
We were made up, we were made up right, I don't know.  
Do you feel it? Do you see it? I don't know.  
(We were made up, we were made up right)

I know you know that I'll love you all around the room  
I'll dream all night to touch you the way I do
