

# Still It's Not Over

Erasure

We crossed our hearts and never hoped to lie  
For the ghosts along The Castro were just walking by  
We went back to scratch and had to start again  
Like a ring of roses everyone was falling down

We made a miracle  
We had to come up with a cunning plan  
A time for quiet contemplation  
Dying on the steps of City Hall

They turned on love and turned their backs  
And left us to a sheer attack  
And I'm not really pleased with that  
And still it's not over  
The universe is big enough  
And there's room for the two of us  
And ignorance it isn't bliss  
And words they can't hurt me

They held us all in very low esteem  
We had to fight for our right, had to steal the scene  
It felt so right to see the rebels run  
Because we know that something good was being done

But you never gave a damn  
We had to come up with a cunning plan  
We were fighting for survival  
We had to look the Devil in the eye

They turned on love and turned their backs  
And left us to a sheer attack  
And I'm not really pleased with that  
And still it's not over  
The universe is big enough  
And there's room for the two of us  
And ignorance it isn't bliss  
And words they can't hurt me

They turned on love and turned their backs  
And left us to a sheer attack  
And I'm not really pleased with that  
And still it's not over

(And still it's not over)

We made a miracle  
Dying on the steps of City Hall

They turned on love and turned their backs  
And left us to a sheer attack  
And I'm not really pleased with that  
And still it's not over  
The universe is big enough  
And there's room for the two of us  
And ignorance it isn't bliss  
And words they can't hurt me

They turned on love and turned their backs  
And left us to a sheer attack  
And I'm not really pleased with that  
And still it's not over  
The universe is big enough  
And there's room for the two of us  
And ignorance it isn't bliss  
And words they can't hurt me
