

Living In Fear

Eric Burdon

Out in the streets
Where the crime rate is rising
There's people out there frightened for their lives
And out on the streets
Where the blood runs like water
And decent people lock their doors and hide

They're living in fear
Fighting for survival
The streets are paved with crime and corruption
There's innocent people

Living in fear ..
Where is the justice?
In this cold end concrete jungle
Where violence end trouble still prevail
And tell me what can we do?
Will we live with this cancer
Or will we find an answer to the plague
For heaven's sake
There's people out there!
Living in fear
Fighting for survival
Knowing that their rival is out there somewhere
We're living in fear
Fig thing for survival
Those streets are paved
With crime end corruption
There's innocent people
Living in fear ...
