

## Q (The Best One of Our Lives)

Evans Blue

Are you saying love  
Or are you saying nothing  
Still life is a crime  
That I can't ignore  
Your perfect ways will follow  
The temperature that's rising  
All this time you never me think

It was the hardest part to know  
It was the fastest we could run  
It was the farthest we could go  
We are alive my angel

Carcerated  
A tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now pull me closer, let the heat take over

Cut me away  
Cut me away  
Don't end it up and  
I tried to love you like before  
If this was a night  
It was the best one of our lives

Are you saying now  
Or are you saying never  
The still frame in my mind cannot be ignored  
And all I can remember  
Is the way you moved your body  
And how your lips never said no  
But it was killing you inside  
Cause you thought I was the one  
And now it's out of your control  
You have arrived my angel

Carcerated  
A tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now pull me closer, let the heat take over you  
You

And we're were drawing lines not to cross  
So we would never feel a thing  
And now it's breaking you apart  
Just like it broke your heart

Carcerated  
A tougher ending  
It sounds so easy  
But every time we were supposed to let go  
We'd make love  
Now pull me closer, let the heat take over

Cut me away  
Cut me away  
Don't end it up and  
I tried to love you like before  
If this was a night  
It was the best one of our lives
