## I'll Be Your Suicide

**Evocation** 

The arrogance in the bitter sweet The serpent queen now is born Constructed deep in your destiny Inside the eye of the storm

I the true messiah Show life in true pain And as your death draws near I'll be your suicide

The ignorance in your deepest fear Confronts the soul of the sick Like a cancer from a tragedy Another dark hole in life

I the true desire Show lust in pure filth As anger shades your sun I'll be your suicide

## Freedom

The lust of this darkness we share
Orgies between you and me
Mindless we bonded for life
We bonded for death
We fear the taste of the bitter bright
Demonic cult we acclaim

I filth we find the release Aligned reflection never lies

I the true messiah Show life in true pain And as your death draws near I'll be your suicide

I the true desire Show lust in pure filth As anger shades your sun I'll be your suicide
