Keep on Breathing

Such sadness in her eyes All she heard was lies Hard to breath and hard to eat Forced to take her violence neat All the walls closin' and doors shut left and right Seemed like the only thing was a long black night No no no no black night No no no but she said Keep on breathin' Keep on copin' Keep on livin' Keep on hopin' No more sadness in her eyes Truth killed off the lies She breathes deep and smiles wide Lady luck rides at her side All the walls are down and the way ahead is clear Seems like she's gonna fly With no more fears No no no more tears No no no cause she said Keep on breathin' Keep on copin' Keep on lovin' Keep on hopin' Don't go under Don't fall down Whatever you give must come round Don't go under Don't fall down must come round No no no no black night No no no 'cause she said

Exilia
