

# Nanovirus

Exotype

Can you feel it  
Can you hear it  
Can you feel it  
Can you hear it

Can you feel it  
Can you hear it  
The carcinogen encapsulate my traits  
And shakes my faith into astasis

Can you feel it  
Can you hear it  
The assesment has been read out  
I wouldn't give my life  
To leave the whole world faceless

I am genetically predisposed to feel  
This is more real than it's ever been  
You can touch it  
Taste it until the end

I am genetically predisposed to feel  
This is more real than it's ever been  
I can touch it  
Taste it

More real than it's ever been  
You can touch it  
Taste it til the end

You've got your dreams  
You're not ready to go  
You've got your life  
And you can take it slow  
You got to live with the choices You've made  
So let the poison course through your veins

It's eating away at you from inside out  
The guilt is sickness corrupting your conscience  
Spread by the word of mouth

Can you feel it  
Can you hear it  
Upload the blame to your mainframe  
I rise up as you fall

You've got your dreams  
You're not ready to go  
You've got your life  
And you can take it slow  
You got to live with the choices You've made  
So let the poison course through your veins

You've got your dreams  
You're not ready to go  
You've got your life  
And you can take it slow

You got to live with the choices You've made  
So let the poison course through your veins

Can you feel it  
The assesment has been made  
The machines will design your faith

You've got your dreams  
You're not ready to go  
You've got your life  
And you can take it slow  
You got to live with the choices You've made  
So let the poison course through your veins

You've got your dreams  
You're not ready to go  
You've got your life  
And you can take it slow  
You got to live with the choices You've made  
So let the poison course through your veins

The machines will design your faith  
Can you feel it  
Can you hear it
