

# Welcome to Hellfire

Exumer

Blackened hearts stone cold raging with deceit  
Battered lives loss of hope death comes as relief  
Last breath of stale air let go of this world  
Another chance to be reborn whatever it's worth

See us roam on these streets paved with blood and fire  
Kingdom come of the one beast and eternal liar  
See us roam on these streets take what we desire  
Time runs out on this earth welcome to hellfire

Blistered eyes blank out shut down what you hate  
Festering sores the hours drip sealing every fate  
Pale skies rancid blood today and forever  
Descent to hell upon you now as we pull the lever

See us roam on these streets paved with blood and fire  
Kingdom come of the one beast and eternal liar  
See us roam on these streets take what we desire  
Time runs out on this earth welcome to hellfire

Decimating all in sight!  
Decimating all in sight - exterminating your life  
Decimating all in sight - death  
Open your arms as you see the light - open your arms as you

Deafening noise gun shots paranoia rise  
Levies break blood flows perishing lives  
Darkness sets crosses turn upside down  
He can't save pray to him desecrate the crown

See us roam on these streets paved with blood and fire  
Kingdom come of the one beast and eternal liar  
See us roam on these streets take what we desire  
Time runs out on this earth welcome to hellfire
