

Close to You

Fade

Been here for a thousand light shades
I close my eyes and i sang for you like
Nothing has ever changed inside

Stuck here and i'm losing control
About to crash, so i'm choosing my way out
How can i fulfill you here

These memories, start to walk away
I cannot place ,everybody say
Tree of love that we grow will soon alter into dust

No need to feel sorry,
I just might be alright
You were my everything i know
Never forget you, i'll see you on the next life
Waiting for you, but i just can't stay
Close to you, Close to you
So close to you

Looked into your eyes but i don't
see 'cause im blinded by your love
Time passed and it made us be two

Talk to you with all of my heart
I never thought that i'd feel this misery,
I had to protect myself

The space between,
Every little thing makes me part in so many ways
Tree of love that we grow will soon alter into dust

No need to feel sorry,
I just might be alright
You were my everything i know
Never forget you, i'll see you on the next life
Waiting for you, but i just can't stay
Close to you, close to you
So close to you

No need to say sorry,
I just might be alright
You were my everything i know
Never forget you, i'll see you on the next life
Waiting for you, but i just can't stay
Close to you, close to you
So close to you
