

Moment of Life

Fade

Deep down in my memories
reminisce the days of joy
Holding back the heart brings that
Torture me in vain

Feeling everything's the same
Keeps me from the yet to see
Working for the essence of the life
Believe a past

Makes us who we are
comes create new beginnings
I breathe and close my eyes
For one last time

With the universe
That moves the earth
My mind in peace

So far away
I can find my way
Just to glorify
Simple things in life
So far away
I will find my way
This is not a choice
In this moment of life

Walking on these dreams tonight
Feeling not to everything
Painless all calms me down
It's eating me alive

In this world of promises
Filled with everything you need
Illusions of the trance that keeps us from
ourselves the past

Makes us who we are
helps create new beginnings
I breathe and close my eyes
For one last time

With the universe
That moves the earth
My mind in peace

So far away
I can find my way
Just to glorify
Simple things in live
So far away
I will find my way
This is not a choice
In this moment of life

The shadow of this hate

Makes everything so strange inside
Never mean to see
But i know this is right
I've had enough of this
So sick inside i cannot stand anymore
This is for last chance

So far away
I can find my way
all to glorify
Simple things in live
So far away

I will find my way
This is not a choice
In this moment of life

In this moment of life
In this moment of life
