

# What Doesn't Kill Us

Faderhead

Listen while you read!  
I fell into a hole  
Found out it was my soul  
I fell into your trap  
And now my spirit's snapped

Laughing, laughing  
I can see how this will end  
Laughing, laughing  
I can see how this must end

You want it all from me  
All for the ego chamber  
And every day it seems  
What doesn't kill us  
Makes us strangers  
This all is just for you  
It's all to make you saner  
The way you're acting now  
What doesn't kill us  
Makes us strangers

You say you had enough  
You say you're giving up  
The little things I do:  
Unnecessary, cruel
