

Snow Angel

Failure

Jets assail your graduation
Embassy doors in the bay
The news is black, but it's a whiteout everyday

A smoking tongue to rat your dreams out
Your brain, it shines just like brand new
What they see is not what they put in you

The snow angel burned out
Ran home and watched her wings cool
She kept her dreams until morning
And took the long way to school

Another failed assassination
A blade of light shows you the way
The news is black, but it's a whiteout everyday
(What they put in you)

The snow angel burned out
Ran home and watched her wings cool
She kept her dreams until morning
And took the long way back home
