

I've been freezing my time  
I've been slowing my breath  
I've been saving my soul  
I want you to freeze to  
Are you haunting me again?  
Are you thawing out my head?  
I want you to get out...

I'm on an ocean that has a brain and makes us dream  
I'm on a mission to wipe imagination clean  
You grow inside me dying time and time again  
I'm on a mission to escape from what my life has been  
Without you

I've been hiding in snow  
I've been treading on ghosts  
Are you haunting me again?  
Are you burning up my head?  
I will never solve algebra of need  
Any thought just might turn to flesh and drag me back to life
