

# Too High for Love

Faith Evans

So you know what my name is?  
Or are you so caught up in you that we're just strangers  
Even though I know all about you 'cause you're famous  
And least inside your head that's going on  
Tell me what card you're on

Come down, I'm there  
You really can't feel the deep love baby  
I'm here, I'm here  
What is it gonna take now baby?  
No care, up there  
From an outer space when I'm the one  
But you're too high for love

It's gonna get alone b  
When the world withdraws around you and you're lonely  
I can tell you're feeling something  
Boo don't show me  
At least inside my head that's going on  
Tell me what card you're on

Come down, I'm there  
You really can't feel the deep love baby  
I'm here, I'm here  
What is it gonna take now baby?  
No care, up there  
From an outer space when I'm the one  
But you're too high for love

Are you so high you're afraid to fall?  
Trust me, I've got you  
Don't you worry at all  
Just let it go  
It opened your pride  
And opened your eyes

Come down, I'm there  
You really can't feel the deep love baby  
I'm here, I'm here  
What is it gonna take now baby?  
No care, up there  
From an outer space when I'm the one  
But you're too high for love

Come down, I'm there  
You really can't feel the deep love baby  
I'm here, I'm here  
What is it gonna take now baby?  
No care, up there  
From an outer space when I'm the one  
But you're too high for love

Baby come down, won't you come down? ('cause I love you)  
Baby come down, won't you come down? (and I need you baby, I do)  
Baby come down, won't you come down? (I do need you)  
Baby come down, won't you come down?  
Baby come down, won't you come down? (baby come down)
